PROFILE

Computer Science undergraduate at IIIT Kottayam and Smart India Hackathon winner with experience in cybersecurity, web development and quantum computing. Quantum open-source contributor and project lead with interests in competitive programming, visual learning and community-led software.

EDUCATION

Indian Institute of Information Technology Kottayam | 2024 - Present

B.Tech in Computer Science and Engineering | CGPA: 8.9/10

St. Philomena's PU College, Bengaluru | 2024

Karnataka II PUC | 96.8%

Carmel School, Bengaluru | 2022

ICSE Class X | 98.6% | All India Rank: 7

EXPERIENCE

National Technical Research Organisation | Cybersecurity Intern

- Contribute to cybersecurity research and collaborate with researchers on secure software systems, vulnerability assessment and security engineering.

Crafx Studio | Web Development Intern

- Develop responsive client websites using HTML, CSS and JavaScript; collaborate with designers on production-ready frontend interfaces.

SELECTED PROJECTS

Automated CCTV Vulnerability Assessment | Smart India Hackathon winner

- Built a platform for automated assessment of CCTV cameras and DVRs, integrating intelligent network scanning with AI-assisted reporting.

Quantum Teleportation over Noisy Multi-Hop Networks | Team Lead, Quandummies

- Completed a study of quantum teleportation reliability using repeater-assisted entanglement swapping for the Quantum Computing for Engineers course.
- Examined hop count, channel noise, qubit loss and link latency, using teleportation fidelity, success rate and end-to-end latency as evaluation metrics.

Locii | Shared drawing boards | Live demo

- Developed a shared-board drawing application for collaborative visual work, positioned as an alternative to Excalidraw.

Visualgo | Project Lead | Live demo

- Led an Openverse DSA visualizer project with visual learning, quizzes and practice questions.

ADDITIONAL PROJECTS AND TRAINING

Fish Freshness Detection | Cedar Initiative, NoxusDynamics LLP

- Contributed to data acquisition, model development, training, optimization, review and presentation as part of Team NCD-3; the team reported 99.62% model accuracy.
- Completed the four-week practical AI training program; certificate awarded 27 September 2026.

Screen Time Management Platform

- Developed a productivity platform for monitoring and reducing screen usage, with responsive user interfaces.

Bunk Counter | Python

- Built attendance tracking and permissible-absence calculations for students.

More projects and open-source work: github.com/ptr25

OPEN SOURCE AND COMPETITIVE PROGRAMMING

- Completed multiple contributions to quantum open-source projects; interested in quantum computing and quantum networks.
- Practice Data Structures and Algorithms and competitive programming on LeetCode and Codeforces.

LEADERSHIP AND COMMUNITY

Openverse Club | Lead

- Lead open-source projects; contribute branding assets, UI mockups and promotional design.

Coders Club, IIIT Kottayam | Sub Lead

- Mentor juniors in Python, Data Structures and competitive programming; organize contests and workshops, including ICPC and IICPC events at the institute.

TEDx IIIT Kottayam | Core Team Member

- Coordinated speakers, event operations, branding and audience engagement.

Fashion Club | Lead

- Managed creative direction and institute-wide fashion events.

TECHNICAL SKILLS

Programming and tools: Python, C, JavaScript, HTML, CSS, Git, GitHub, Linux, VS Code

Foundations: DSA, Operating Systems, DBMS, Computer Networks, Object Oriented Programming

RECOGNITION AND INTERESTS

Smart India Hackathon winner and institute representative; debate competition winner; former Head Girl, Carmel School. Interests include quantum computing, cybersecurity, AI, open source, competitive programming, design and product development.
